

Emsisoft Cloud Console

August 2019

www.emsisoft.com

Say goodbye to clunky, feature-limited consoles and desk visits.

Meet the new Emsisoft Cloud Console

The screenshot displays the Emsisoft Cloud Console interface. At the top, it shows 'My EMSISOFT' and the user 'John Doe'. The left sidebar contains navigation options: MY OWN (Devices, Licenses), CLOUD CONSOLE (Workspaces, CONTOSO LTD.), Protection Policies, Permission Policies, Settings, ASUS-ROG, Protection Settings, Scan, Quarantine (2), and Logs.

The main content area is for 'Contoso Ltd.' and features a 'Managed devices' table with a search bar and an 'Add device' button. The table lists the following devices:

Computer name	Status	Last update	Last scan	Last alert	Protection Policy
ASUS-ROG	PROTECTED	08/09/2019 7:33 PM	08/03/2019 10:04 AM	08/02/2019 10:58 AM	New computers 9 edits
VM-W7X32	PROTECTED	08/09/2019 10:15 PM	08/09/2019 8:40 PM	08/09/2019 8:35 PM	Managers 1 edit
VM-WIN7X64	OFFLINE	06/10/2019 7:07 PM	-	-	Admin 2 edits
KIRILL	NOT MANAGED	07/17/2019 10:41 AM	-	-	-
WIN10-STAGE	NOT MANAGED	08/08/2019 2:51 PM	-	-	-

Below the table is an 'Unresolved issues' section with two items:

- Device "vm-win7x64" hasn't updated for 60 days. [Fix now](#)
- Device "KIRILL" hasn't updated for 23 days. [Fix now](#)

The dashboard includes two charts:

- Devices:** A donut chart showing 10 total devices: 2 Protected (green), 7 Offline (grey), and 2 Not managed (red).
- Protection alerts:** A line chart showing the number of alerts over time from July 15 to August 5. Alerts are categorized by Surf Protection (red), File Guard (blue), Behavior Blocker (orange), and Scanner (green).

At the bottom, there is a 'License' section and a 'Customer Support' button.

A completely free and easy-to-use web-console for managing the protection of all your endpoints, clients and sites.

'This is a game changer'

- McFarland IT Solutions -

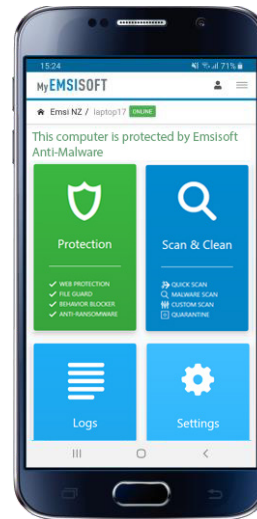

It's better than being onsite

'This is hands down the best cloud access I have ever seen with antivirus. It is literally a mirror of what you see on the desktop.' – Stedman Computer Solutions

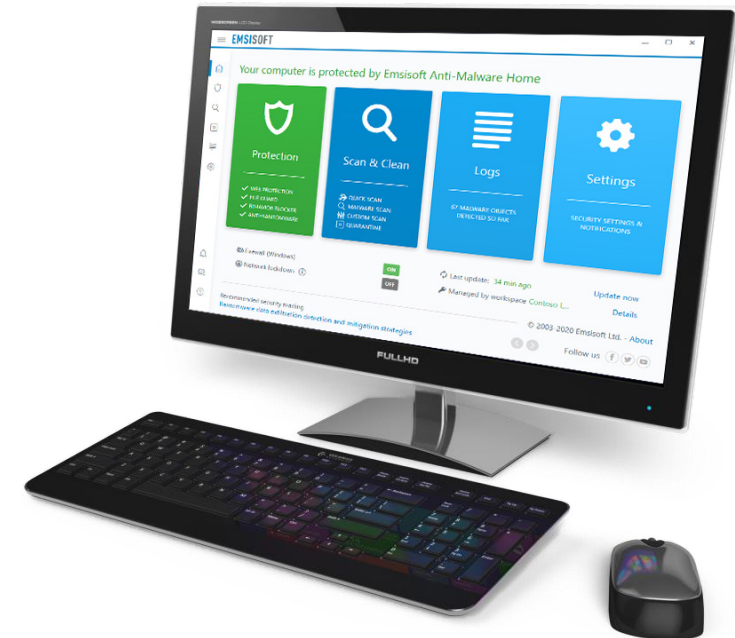

Protected Device

Mobile App

Online Console

Manage your security and respond to alerts anywhere, anytime. Emsisoft Cloud Console can be accessed via a web browser or via apps for Android and iOS from any device. See exactly what your users see. Being out of the office doesn't mean you have to be out of touch.

Pushing productivity to a new level

'It controls all aspects of the program and it's leaps and bounds from anything else I've dealt with so far.' – McFarland IT Solutions

Initiate malware scans All scan types with all available settings.	Real-time notifications Get instant notifications of scan results via email or webhooks.	View and edit quarantined objects Including re-scanning and submission to our malware lab.
Full forensic logs See exactly what happened and who triggered an action.	Custom protection policies Apply team-based policies with ease.	Custom user permission policies Set user- or team-based permission policies.
Custom device-specific settings That can be set online or locally.	Multi-tenant workspace model Define different user roles to access a workspace.	Safety & privacy Designed from the ground up with security in mind.

Time savers for security admins

'I also want to applaud the ECC. I've been hammering it and so far, it has done extremely well.' – Aheliotech

Install Emsisoft protection

 **Install protection on this device** Download
[Alternative downloads](#)

 **Send download instructions by email** Send email

Emsisoft Cloud Console makes deployment super-simple

- *One-click installation and license activation:*

Simply download your custom installer, run it and wait a few seconds until the device shows up in the management dashboard – fully activated and updated.

- *Silent GPO/MSI installation support:*

Roll out your new favourite protection software via Active Directory automated installations. No manual action on the workstations needed.

Unresolved issues

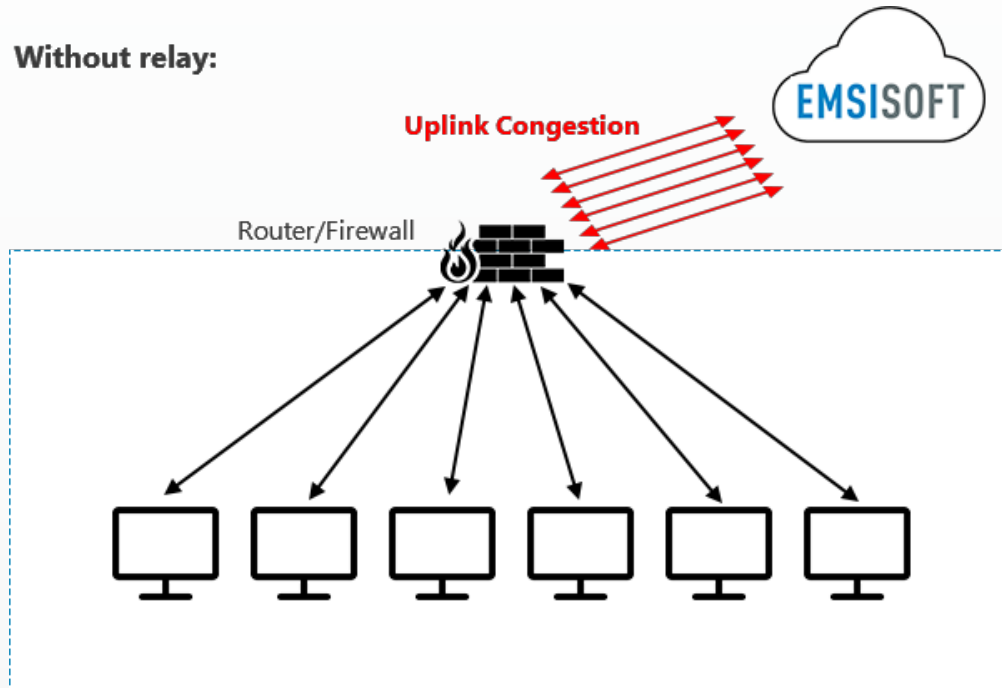

- 🔄 Device "vm-win7x64" hasn't updated for 60 days. [Fix now](#)
- 🔄 Device "KIRILL" hasn't updated for 23 days. [Fix now](#)

Quick-fix shortcut in workspace dashboard

Use the dashboard to quickly fix disabled protection, missing updates and other problems without needing to be onsite.

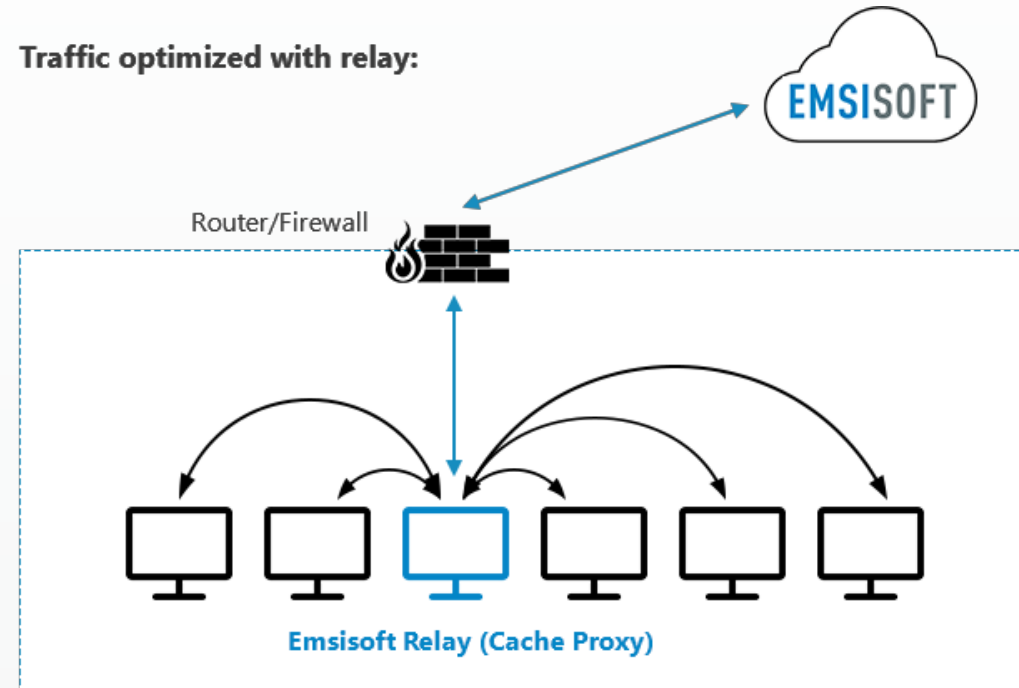

Save precious bandwidth with Update-Relays

Without relay:

All devices download updates directly from the Internet, which may overload your local network capacity and also your uplink.

Traffic optimized with relay:

One or more of your devices are configured to act as a relay for all data transfers. Relays cache all downloads to reduce the total amount of internet traffic. Only data from and to Emsisoft servers is allowed.

Multi-workspace support for Managed Service Providers

Workspace ↑	Devices	Unused seats	License renewal due	Last alert	Findings last 30 days
▶ Contoso Ltd.	9	0	03/07/2021	04/11/2019	-
